

# WAMURAN PUJA HALL

UPDATE

(GURU PUJA 2018)

Jai Shri Mataji

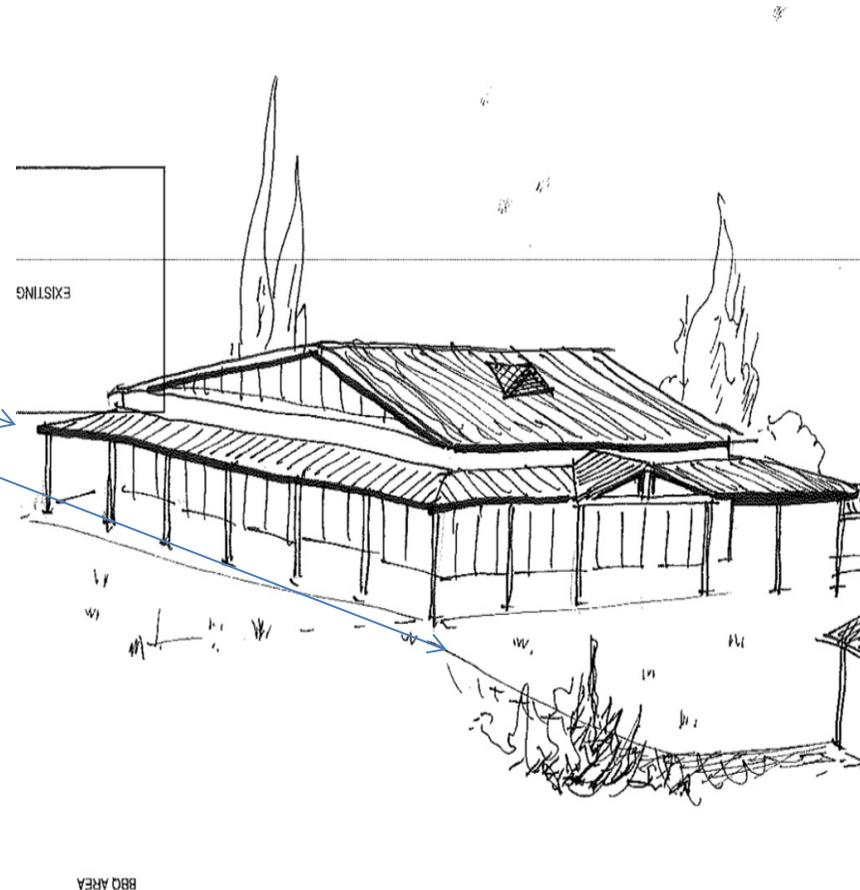

# To The National Collective

- Jai Shri Mataji
- We wish to bring the National Collective up to date with the Wamuran Puja Hall Project.
- Through this power point we wish to share with you the latest information and some pictures of the materials that will be used in the new Puja Hall to create a special place for us to gather, grow and enjoy in our spiritual ascent through Shri Mataji's vibrations and blessings.
- We recognise that many yogis have donated money and we wish to take this opportunity to thank you and to inform you of the following:

- Over the past 5 – 6 months we have been working with some builders to make the Puja Hall Project at Wamuran a reality.
- The builders have been fantastic in working through each of the redesigns and ideas that have been put forward.
- We have now signed a contract with builders and the next month should be drawings and council approval.
- We are hopeful that work will begin by the end of September and we will have Christmas Puja in the new hall.

# Drawing of Puja Hall

- This is a concept 3D view showing East (carpark side)
- North face (main entrance)
- Completed size 14m x 14m
- 3m wide verandah on East and North
- 11m x 4m area on west side to incorporate puja prep area and storage

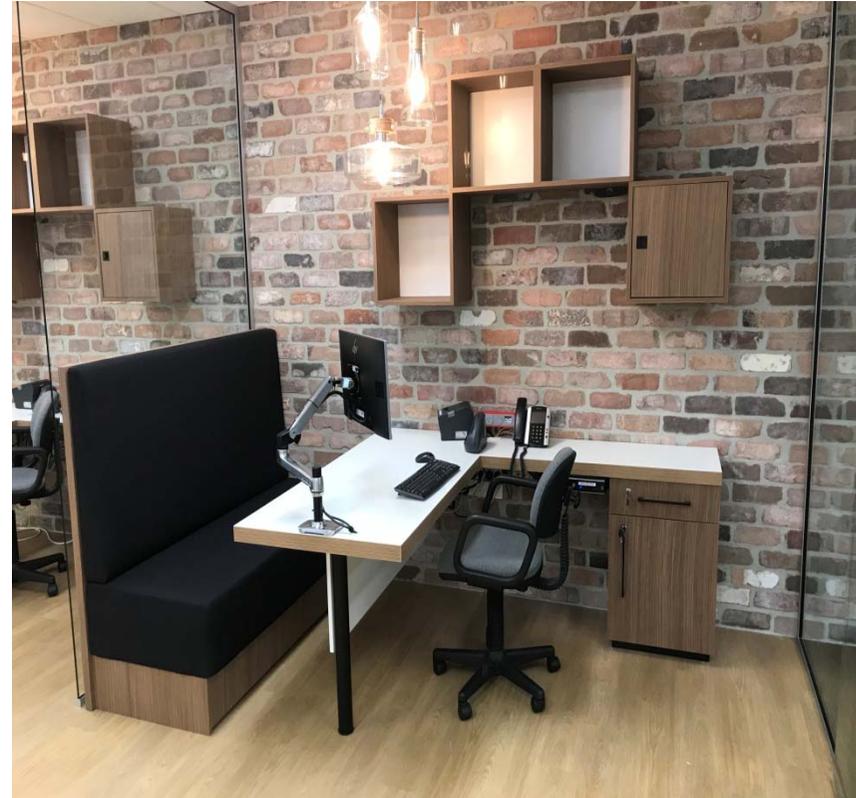

# Ceiling Timber Panels

We are hoping to reuse the current timber doors that were made by David Flesser as timber panels for the ceiling or as a timber wall feature. This will connect the old with the new.

# Brick Tiles

- We have been able to incorporate brick work into the design of the new Puja Hall through the use of brick tiles. These brick tiles are made from recycled bricks and are about  $\frac{3}{4}$  size of a normal brick.

Once again we wish to thank everyone from local and interstate yogis to the Trustees, National Councillors and State Councillors for their support and donations over the past few years.

Without this support the Wamuran Puja Hall would not have happened.
